

Patent Attorney – Senior Practitioner

Physics or Engineering (mechanical, electrical, mechatronics)

There is an open vacancy in our firm for a senior practitioner with the drive and energy to develop and build a team of patent attorneys operating in the fields of physics and engineering.

If you would love the opportunity to build a group within an established and vibrant business dedicated to providing quality intellectual property services to a broad range of businesses and research institutions, get in touch with us now.

You will have the opportunity to be part of a workplace that is modern and progressive, where people are put first, and where client interactions are rewarding and inspiring.

You would be involved with a wide range of local and international clients across different technologies, including individual inventors, start-ups, exporters, research institutes, and everything in between.

In addition to a strong technical background and an established track record as a patent attorney, you will need to have excellent communication and people skills, ambition, enthusiasm for business development and marketing, and a willingness to be involved in all aspects of our business.

An ownership position in our firm is a real prospect for the right person to build towards.
